# Early Detection Challenges

**Breast cancer is the most common cancer in women globally**

With limited access to early detection, most cases present late, with poor prognosis

Few Doctors

Pain & Radiation

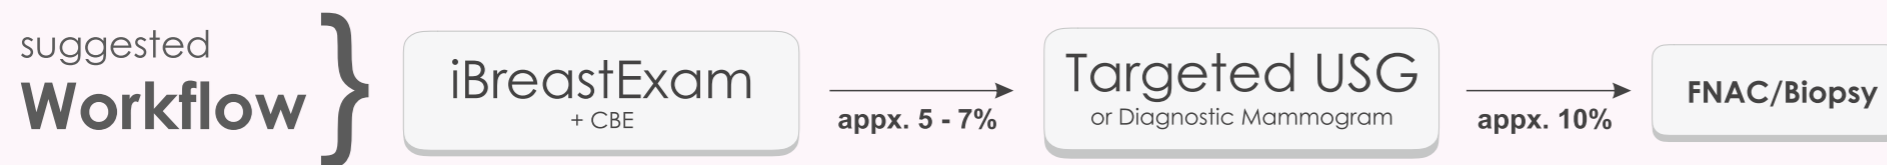

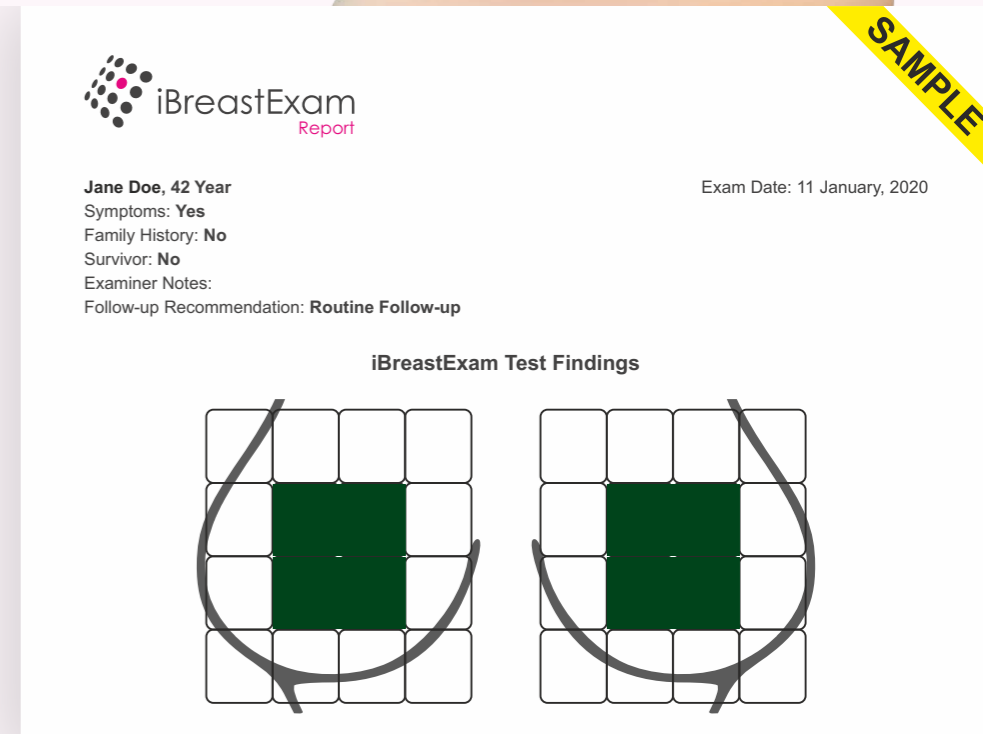

High Cost

## Clinical Validation

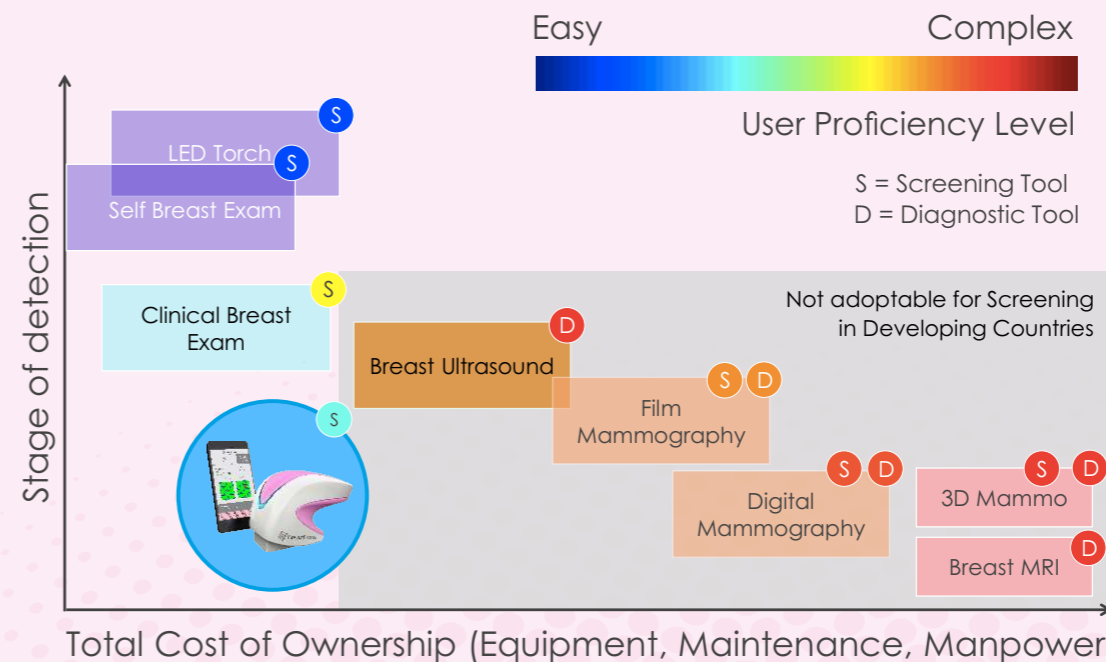

| Clinical Study Title, & Year   | Sensitivity | Specificity | NPV | PPV | Benchmarked By       |
|--|-------------|-------------|-----|-----|----------------------|
| A cost-effective handheld breast scanner for use in low-resource environments: a validation study. Published in WJSO, October 2016 | 86%         | 89%         | 96% | 70% | Mammogram & USG      |
| Noninvasive and Low-Cost Technique for Early Detection of Clinically Relevant Breast Lesions. Published in IJGO, June 2016         | 84%         | 94%         | 98% | 60% | Mammogram, USG & CBE |
| Breast Tumor Detection using Capacitive Sensor: First Clinical Report. Published in JACS, June 2013                                | 87%         | 88%         | 75% | 61% | Mammogram            |

Ultra Portable. Wireless. Battery Powered. Cloud Connected.  
 Minimal Training. Instant Results. Point-of-Care. Low Cost.

### Operable & Scalable in Limited Resource Settings

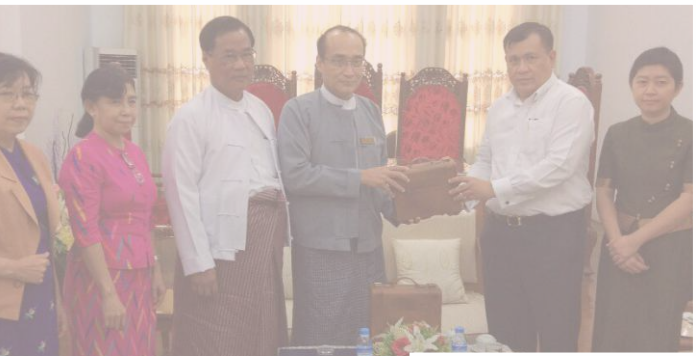

| "Gold Standard" Modalities | Accessible & Affordable | Easy to Use & Train | Scalable & Connected | Standardized & Objective |
|----------------------------|-------------------------|---------------------|----------------------|--------------------------|
| Mammography                | X                       | X                   | X                    | ✓                        |
| Breast Ultrasound          | X                       | X                   | X                    | ✓                        |
| Clinical Breast Exam       | ✓                       | X                   | X                    | X                        |
| iBreastExam                | ✓                       | ✓                   | ✓                    | ✓                        |

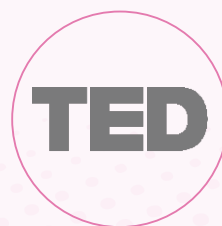

iBreastExam enables earlier stage detection at low-cost and minimal training, compared to other options
